How Assange Won in the UN and What It Means, Carey Shenkman
Let’s fight internet shutdowns! Tell us on Twitter using the hashtag #KeepItOn:
1. Have you ever experienced an internet shutdown — What is it like?
2. If not, what do you think would be the worst thing that could happen to you if the internet was shut off tomorrow?

The network is UCSFguest (no password)
This is a “device at ease” event. Given the large numbers, we ask that you do not overwhelm the network (e.g. using your own data plan can help). Importantly, remember to take appropriate steps to protect your device if using the public network.
