F (i) Designing Consent Into Social Networks, *Caroline Sinders* (ii) Hacking Politics, *Democracy Earth* (iii) Building an Inclusive Community: Code of Conduct Principles and Best Practices, *OTI* (iv) How One Law Turned Every Peruvian into a Target of Surveillance, *Hiperderecho* (v) How Assange Won in the UN and What It Means, *Carey Shenkman*

G (i) Tor: Ask Me Anything! (off-the-record), *The Tor Project* (ii) Coalition This, Coalition That: Building Local Networks for a Global Movement, *Bolo Bhi* (iii) New Meets Old [Media]: What Online News Can and Can't Do for Democracy, *Reboot* (iv) The Implications of Hacking Team in Latin America, *Derecho Digitales* (v) What's an Internet Shutdown? Let's Crowd-source a Definition to Protect Human Rights and the Economy, *Access Now*

H (i) Cybersecurity, Professional Ethics, and Encryption: How and Why Professionals Must Encrypt, *Constitutional Communications, Access Now* (ii) Building a Communications Technology Rights Agenda, *NESRI*

I (i) Accountability of Internet Governance Organizations, *Farzaneh Badii* (ii) Lack of Digital Short Feedback Loops That Lead to Human Right infringements in Developing Nations, *Priyash Bista* (iii) Swiping Left on University Servers: How College Students Are At-Risk Users, *Olivia Martin* (iv) Human Rights of Adolecent and Female Internet Users in Brazil, *Brazilian Institute of Cyberlaw*

Let's fight internet shutdowns! Tell us on Twitter using the hashtag #KeepItOn:
1. Have you ever experienced an internet shutdown — What is it like?
2. If not, what do you think would be the **worst** thing that could happen to you if the internet was shut off tomorrow?

Drop by our **Digital Security Clinic** if you have a question about your own digital security. Located near the Atrium, this clinic will run for the length of the conference.
Coordinated by the Access Now Digital Security Helpline

**The network is UCSFguest (no password)**
This is a "device at ease" event. Given the large numbers, we ask that you do not overwhelm the network (e.g. using your own data plan can help). Importantly, remember to take appropriate steps to protect your device if using the public network.

WIFI

RIGHTSCON IS BROUGHT TO YOU BY

accessnow

Access Now (accessnow.org) defends and extends the digital rights of users at risk around the world. By combining innovative policy, user engagement, and direct technical support, we fight for open and secure communications for all.
